## Professional Summary:

I am a motivated and adaptable software developer with strong skills in web development, programming, and data analytics. Experienced in freelance and team-based projects; currently pursuing a BAS in Software Development. Ready to bring energy and problem-solving to professional development environments.

## EXPERIENCE:

### Code Path Online Internship, Remote - June 2025 - August 2025

- Participating in professional development sessions focused on coding interviews, system design, and team-based software engineering projects
- Collaborating with other interns to build applications and practice technical communication

### Freelance Developer - January 2022 - Present

- Developed tools and full-stack websites using Java, Python, HTML/CSS, and SQL, demonstrating strong problem-solving and implementation skills
- Assisted classmates and clients with debugging and project organization
- Utilized GitHub for version control and collaboration, ensuring efficient code management and seamless feature integration

### Tech Assistant - Unique Construction Works, Full time - February 2022 - December 2024

- Assisted tile crews with on-site preparation and cleanup, ensuring jobs were completed efficiently and up to safety standards
- Managed customer communication and contributed to web-based marketing
- Bridged the gap between fieldwork and technology by combining technical web skills with real-world construction support

### Park Reservation Web Tool - January 2025 - Present

- Engineered a robust web application enabling tournament directors and users to reserve disc golf parks with ease
- Designed and implemented advanced search functionality including fuzzy search, filters, and voice input using JavaScript
- Delivered a responsive, user-friendly layout using HTML/CSS and ensured accessibility across desktop and mobile platforms

### Student Portfolio Template Website - September 2024 - December 2024

- Created a reusable website layout for showcasing certificates and resumes
- Structured clear sections for key achievements, designed clean UI elements, and implemented upload-ready features
- Deployed project using Netlify and practiced mobile responsiveness

### Unique Construction Works Website - January 2023 - December 2024

- Designed and maintained the official company website, including service pages, gallery, contact forms, and pricing features
- Implemented basic SEO practices to enhance discoverability and supported client quote requests
- Helped modernize the company’s online presence and improved client engagement through well-structured content and troubleshooting

## EDUCATION:

Green River College, Auburn, WA — Bachelor of Applied Science in Software Development
